- Lockable tool trolley
- Professional image thanks to corresponding labelling

Order number:

03.9314-4940.4 / 760201

Product information:

ATE workshop trolley for brake maintenance and repair

Thanks to the new ATE workshop trolley, all the important tools required for professional brake service work are ready to hand. The trolley has seven drawers, five of which are equipped with ATE brake tools. The other two drawers can be used to store other tools.

The tools are organized in the different drawers specifically intended for cleaning, resetting, flaring or measurement/assembly to make sure that they are always immediately available.

The ATE tools are kept within easy reach and in exactly the right place in the flexible foam inlays. Another advantage of these inlays is that any missing tools can be identified immediately. The trolley's firm work surface means that small jobs can be completed directly at the vehicle.

For more information on the workshop trolley, call the ATE Hotline on 01805 221242 (0.14 €/min. from a German land line, max. 0.42 €/min. via a mobile phone operator in Germany). You'll also find the whole range of ATE brake service equipment and tools in the ATE tool catalogue, or on the Internet at www.ate-info.de.
